

Join us for a SUMMER GRILL OUT!

Date: Wed., June 20, 2018

Time: 4:00 p.m. to 7:00 p.m.

Location:
Hamilton Telecommunications
1006 12th Street

As a thank you to the community and to our customers for their business and loyalty, we invite you to attend our customer appreciation event.

Learn more about our fiber-to-the-home construction project, see fiber splicing demonstrations and tour our new corporate office building.

We will be serving a complimentary meal with bratwursts, hot dogs or polish sausages and sides. Everyone is invited to attend — we hope to see you there!

Thank You *for your business!*

Now Installing Fiber to the home in Aurora!

If you have received a postcard in the mail and have not yet been in contact with our office, please give us a call to set up a time to have a site survey completed at your house!

A list of the subdivisions which are next on our list for site surveys are available on our website at: Hamilton.net/fiber-progress/. We will keep the list updated as we move into new areas.

Fiber to the home delivers the fastest, most reliable internet service available. We are working hard to ensure that you have the best connectivity to internet and so much more!

Grand Island • 1229 Allen Drive, Suite E

Get The Most From Your Internet Speed

As your local internet provider and neighbor, Hamilton is committed to delivering caring customer support. Part of that commitment is providing you with helpful information to make your connected experience the best it can be.

With Hamilton DSL or fiber internet services, you should receive the speed you pay for all of the time, whether its 5:00 pm or 1:00 am. There are, however, a number of external factors that commonly contribute to the slowing down of your internet speeds.

If you are experiencing Wi-Fi slower than expected, ask yourself these questions:

- **Is my Wi-Fi slower than a hard-wired connection?**

Wi-Fi has revolutionized the way we live and the way we enjoy our entertainment. But it is still not quite as fast as a hard-wired connection.

- **How many devices are being used in my household simultaneously?**

Wireless or mobile devices such as tablets, phones, laptops, streaming sticks, etc. use a great deal of bandwidth. If there are multiple users attempting to stream videos, surf the web, or video chat on a regular basis and you are experiencing sluggish speeds—it may be time to upgrade your household internet speed. Check out our guide, “How Much Speed Do You Need?”, at Hamilton.net/guide-to-broadband.

- **How old is my Wi-Fi Router?**

Older Wi-Fi routers can limit how much speed you can receive. What many people do not know is that in addition to continuously evolving services and performance standards, a wireless router's performance degrades over time. Like everything else that remains on and in-use 24x7x364—it does have lifespan limitations.

- **Where am I attempting to access Wi-Fi?**

Location, location, location. Your Wi-Fi connection relies on radio waves to travel throughout your home. Oftentimes, speeds can decline depending on the placement of the router in conjunction with desired access points. Multiple thick walls, large objects, different levels (first floor to basement) can all block signals and shorten the Wi-Fi range.

As always, we at Hamilton are happy to assist you in diagnosing and troubleshooting your connection. Ensuring a fast and reliable online connection for you is our priority.

We strive to make exceptional customer service a cornerstone of everything we do at Hamilton. Thank you for your confidence in us!
