

## Now Installing Fiber to the Home in Aurora

As we continue expanding our network to bring fiber to the homes of thousands of residents in Hamilton County, we want to keep you informed every step of the way. With Hampton close to completion, construction is officially underway in Aurora. Our projected goal is to have fiber to each home within the Aurora city limits by the end of 2018.

You may have seen the Hamilton<sup>®</sup> fiber trucks in various locations throughout Aurora. Here is a brief snapshot of what the construction process looks like:

### Site Surveys

Completing a fiber site survey to each home is the first important step we take and allows us to determine installation and hardware needs for each household.

*If you received a postcard in the mail and have not yet connected with our office, please give us a call to schedule a time to have a site survey completed at your house!*

### Digging the Fiber Line

We are working hard to install the infrastructure necessary to deliver fiber accessibility and also have contractors assisting us with this work. That means we safely lay fiber lines underground to ensure premium service and protection. After the fiber line is buried to your neighborhood, we will bury fiber from the node directly to your house. Additionally, we will be completing some work in the rural areas to ensure all of Aurora is primed for fiber-to-the-home access.

### Who is First in Line

A list of the subdivisions that are next on our list for site surveys is available on our website at: [Hamilton.net/fiber-progress](http://Hamilton.net/fiber-progress). We will keep the list updated as we move into new areas.

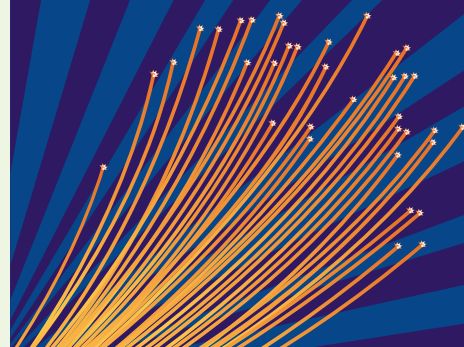

Fiber to the home delivers the fastest, most reliable internet service available. We are working hard to ensure that you have the best connectivity to internet and so much more!

## SAVE *the* DATE
