

Connecting Your World with Fiber to the Home

Our construction crews have had a busy summer and are making big progress with our fiber construction. We have buried over 800 miles of fiber in preparation for this project.

We have also added to our team to accommodate projects, and we continue to hire even more crew members to continue getting you connected.

Aurora

If you live in Aurora and are not yet connected to fiber, contact us to schedule an installation.

Doniphan

Mainline work is underway and has been completed in many areas. When you receive a postcard telling you we'll be in your area, contact our office to schedule a Fiber Site Survey.

If you live in Amick Acres and are not yet connected to fiber, contact us to schedule an installation.

Caleb and Kirk on-site

Rural customers in Phillips, Marquette, Hordville and Hampton

We continue to complete construction necessary to get fiber ready to connect to your community and homes. **If you live in the town of Hampton and have not already been connected to fiber, please contact us to schedule an installation.**

As our projects progress, we'll proceed with mainline construction in the rest of our local exchange area, including in Giltner, Marquette, Hordville, Phillips, Stockham and Trumbull.

Top 3 Internet Safety Discussion Tips for Parents

Today, 84% of parents worldwide fret about their children's security online, but fewer than six out of 10 have spent a half-hour talking about data privacy with their kids. Here are three key areas that should be discussed with your kids.

Online Safety

Don't assume that your children understand the basics of how to keep themselves protected. Instead, remind them to be cautious about opening unsolicited emails, and make it clear that they should never download any software without coming to you first for approval. You may also want to have your kids use two-step verification, which makes it harder for people to gain access to their accounts.

Age-Appropriate Browsing

Managed Wi-Fi allows parents to restrict the content that can be accessed online. By setting age-appropriate controls, you can prevent your kids from being exposed to adult material, violent images, inappropriate ads and other harmful or upsetting content.

Excessive Screen Time

A way to limit screen time is by temporarily freezing the internet to one or all devices on a communicated schedule. Managed Wi-Fi allows you to create profiles for each family member and enables parents to monitor and set usage constraints for each profile.

To learn more about how to protect your online activities at home, check out Hamilton Managed Wi-Fi at hamilton.net/managed-wifi.

Remember to Call 811 Before You Dig

Every digging job — from installing a new mailbox to revamping your backyard landscape — requires you to call 811 to have utility lines properly marked.

Simply tell the operator where you're planning to dig and what type of work you'll be doing. The local utilities company will send a locator to your property, free of charge!

Call 811, then you'll know what's below and be able to dig safely.

As one of your local service providers, we thank you in advance for your cooperation!

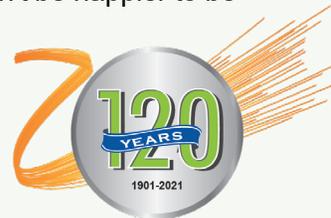

Celebrating 120 Years with You!

120 Years of...

- Community Support
- Innovative Technology
- Trusted, Reliable Solutions
- Accessibility Advocacy
- Commitment to Our Customers
